Dear Parents / Carers

Times Tables Rock Stars (TTRS)

Please find below a guide to explain a little bit more about Times Tables Rock Stars and how you can help your child with this at home. We hope that you are familiar with this teaching tool that your child can access at home, but for those of you that are not, then I am sure this will be of use to you. Our expectation is that your child spends a minimum of 5 minutes per day, 5 days a week playing the different games online. It really is a fun way to help teach and consolidate the children's knowledge of multiplication and division facts. At the end of Year 4, children are expected to rapidly recall and know their multiplication tables up to 12 x 12. Therefore, the children now sit a Multiplication Tables Check (MTC) which is a statutory, online assessment for all Year 4 pupils in mainstream primary schools in England. This enables you to prepare your child for the MTC well in advance. The children in Key Stage 2 really enjoy playing the games in school and they also complete 3 minute sessions, 3 times per week, which is tailored to their individual focused times tables in school. By continuing to practise at home, it will give your child the opportunity to earn themselves certificates in assemblies, as well as the chance to earn a prize at the end of each month.

What is TTRS?

TTRS is an award-winning maths learning platform that helps pupils practise and recall their times tables like a rock star, using paper worksheets, and playing online adaptive question-based games via the app and browser. TTRS takes the hassle out of and puts the FUN into learning and recalling times tables! Their innovative learning platform helps children become fluent in their times tables, which in turn cuts thinking delay, which enables your child to dedicate more time in solving problems.

Now used in over 16,000 primary schools worldwide, TTRS is a trusted classroom resource that is helping boost multiplication and division recall and maths confidence of millions of students across the globe. This is a programme that reaps rapid results, and thanks to the exciting gamification and rewards, children love playing it.

TTRS is available to play on mobile devices via their app, as well as their website, you child will be able to practise at home or on-the-go, whenever suits your family.

If you have any questions or problems accessing TTRS, then please speak to your child's class teacher and they will be happy to assist you.

Thank you for your continued support.

With kind regards

Mrs Quigley
